Mains Isolation Transformer LL1658

LL1658 is a C-core mains transformers for isolation and DC current elimination. The core is assembled with a carefully selected, very small air-gap to compensate for any mains DC-unbalance. Estimated power rating 100 VA which can be increased with good cooling.

Physical dimensions, pin and mounting hole layout (all dimensions in mm)

Weight:	1.35 kg
Copper resistance, windings 1 - 3 and 7 - 5 respectively	11.3 Ω
Copper resistance, windings 10 - 12 and 14 - 16 respectively	9.9 Ω
Isolation between windings / between windings and core	4 kV / 4 kV

Winding schematics:

Suggested use:
