

## Loudspeaker transformer LL3610

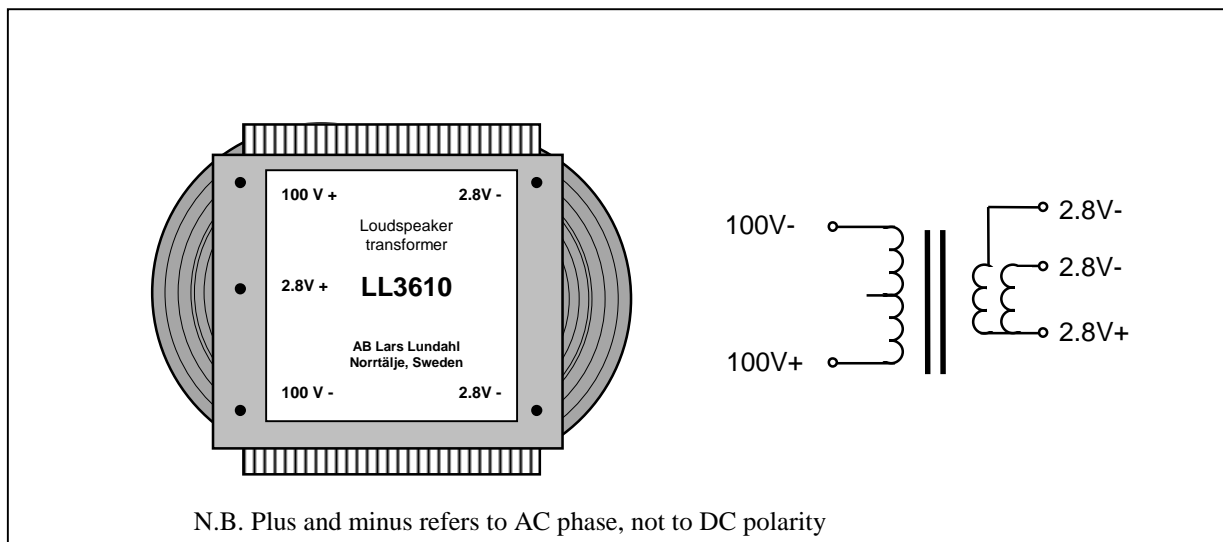

The LL3610 is a loudspeaker transformer for 100V systems.

Output power level: 1 W across 8 ohms

Max number of 8 ohms loudspeakers connected: approx 20

The transformer is designed with separate primary and secondary windings.

Turns ratio 100 : 2.8

Dimensions: (Length x Width x Height (excluding pins) 60 x 55 x 35 mm

Weight 0.35 kg

Resistance of primary 11 ohms

Resistance of each secondary < 0.05 ohms

Frequency range 100Hz - 10 kHz

Usage: Secondaries should always be used in parallel.
