## Company statement regarding the RoHS directive 2002/95/EC

From mid June 2005, all soldering at Lundahl Transformers are carried out with lead-free solder. We have also ensured from our suppliers that all materials used in production of our transformers are RoHS-compliant. Thus all transformers manufactured after July 1, 2005 are RoHS compliant.

All Lundahl RoHS-compliant transformers are market with an encircled "F" on the label, except in some very rare cases (e.g. LL6404, LL1572, LL1574....) where the label is actually too small to accommodate anything but the type number.

Sincerely

Per Lundahl

Managing Director
